

***FIELD WORK PERMISSION SLIP
2015-2016 School Year***

Transportation necessary during the school day

Teaching and learning at Tech Valley High School is closely tied with business and community agencies in the Capital Region. Our curriculum will require frequent trips on buses hired by the school to transport students to and from local companies and community resources that are integral to the curriculum of the school. For example, students will be on buses during the school day to conduct water and soil testing as part of their environmental science curriculum, they will visit museums and cultural resources as part of their field work in their Humanities classes.

These educational opportunities are part of the curriculum of TVHS. **Students and parents will receive periodic notification of the off-premises trips students will be attending.**

Dear Parent/Guardian:

Your son/daughter will be attending many off-site learning experiences as part of the approach to teaching and learning at Tech Valley High School. We would like you to acknowledge this aspect of the curriculum and indicate by signing and returning this form that you give permission for your son/daughter to attend these learning experiences.

The students will always be accompanied members of our staff, who will be in charge of these experiences. Because these are school-sponsored activities, students are expected to represent Tech Valley High School in an appropriate manner at all times.

Please sign below and return to the Administrative Assistant at TVHS.

Date: _____
